EP Grains

A complete range of high quality grains suitable for use in horse diets

Barley - an excellent source of energy and fibre, making it a highly versatile ingredient that is widely used in horse diets. Unprocessed barley is poorly digested in a horse's small intestine, whereas steam rolling improves digestibility. All Barley used in Frankling EquinePro feeds is cleaned prior to manufacturing.

The Frankling **EquinePro** range includes:

- Whole Barley
- Steam rolled Barley
- Steam rolled Barley with Molasses

Oats – also an excellent source of energy and fibre – it considered a “safer” grain than barley. The starch in oats is digested in the small intestine, yielding more glucose, compared with other grains. All Oats used in Frankling EquinePro feeds are cleaned and machine dressed prior to manufacturing.

The Frankling **EquinePro** range includes:

- Machine Dressed Oats
- Machine Dressed Oats with Honey
- Steam rolled Oats

Maize – a highly palatable grain that is higher in energy, and lower in fibre compared with barley and oats, making it useful for putting condition on. All Maize used in Frankling EquinePro feeds is cleaned prior to manufacturing.

The Frankling **EquinePro** range includes:

- Whole Maize
- Cracked Maize
- Steam rolled Maize
- Cracked Maize with Honey

Lupins – an excellent source of protein. The good lysine levels give them an important role in metabolic function, a healthy nervous system, and for proper immune system function. Lactating mares, growing foals, breeding stallions and horses under stress are higher risk of Lysine deficiency. All Lupins used in Frankling EquinePro feeds are cleaned prior to manufacturing.

Frankling **EquinePro** range includes:

- Whole Lupins
- Cracked Lupins
- Steam rolled Lupins

Quality Assurance

Frankling Custom Feeds (FCF) believes the information contained in this document to be true and correct for the applications as described. Updates may be made to product specifications, usage guidelines, and/or ingredients used in these products. **Customers must seek advice from FCF if there is any doubt regarding the usage of products described.** Subject to those terms implied by statute which cannot be excluded restricted or modified, no warranty of accuracy or reliability is given and no responsibility to the customer or any other person is accepted for errors or omissions howsoever arising, including matters arising through negligence by FCF, it's Directors, employees or agents.

With over 30 years experience in the grain industry, Frankling Custom Feeds has an established history of providing quality products with superior service.

Our dedicated equine manufacturing site has specialized in manufacturing equine feeds since 2004.

All our sites are accredited under FeedSafe® - the quality assurance program of the SFMCA. This ensures all products are of the highest quality and standard.
